

EDI Link Version 8.0 Integration Solutions That Fit

EDI Consulting Group, Inc.—The Proven Leader

EDI Consulting Group has an unprecedented commitment to customer satisfaction, which allows us to guarantee your company's e-Commerce initiatives are successful. As the leading EDI authority, EDI Consulting Group integrates the latest e-Commerce technology with today's premier business applications. Our software seamlessly bridges into many popular accounting and manufacturing solutions, which allows companies to operate at today's busy standards. As the leader in the industry, you can rest assured knowing that EDI Consulting Group is on your team.

Getting Started with EDI

Whether it's ANSI X-12, UN EDIFACT, VICS, TDCC, ASCI, AIAG, UCS, or NWDA, EDI Consulting Group can fulfill all of your EDI needs. Getting started with EDI is very simple. Within 24 hours from the time you inquire, our panel of EDI coordinators will have a plan of action in place including: Pricing, Estimated Implementation Time, Testing Procedures, Training Information, and Overall scope of the entire project. From there, it is up to your company to decide if EDI Link v8.0 is the way to go.

The Link (bridge)

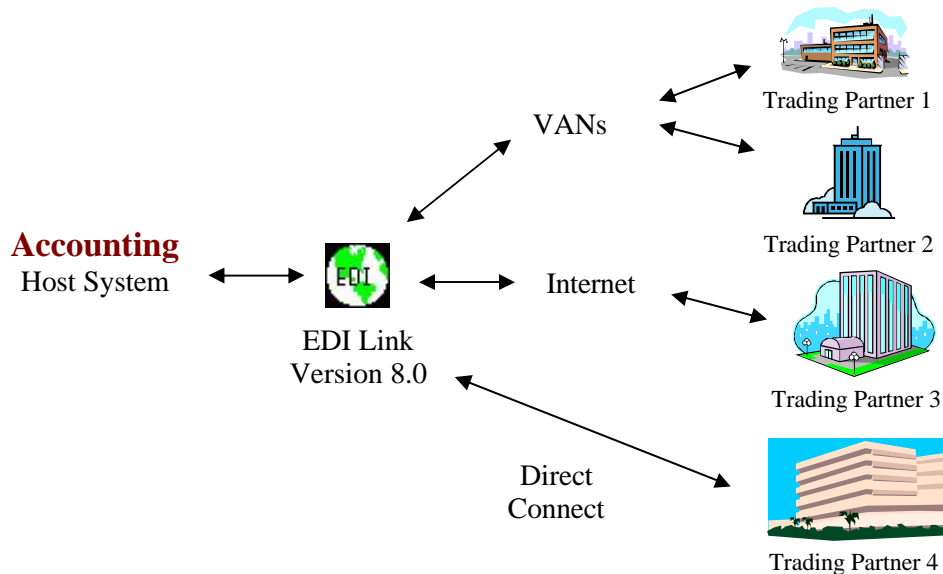

The Link, or commonly known as the bridge, is what makes EDI Link v8.0 different from all other EDI software packages. The difference is that EDI Link v8.0 will automatically incorporate data into and from the appropriate accounting module. This eliminates the re-keying of information sent by EDI. EDI Link v8.0 provides the only bridge between the accounting system and EDI trading partners, thus allowing sales orders, purchase orders, and invoices to be processed and/or generated and posted to the appropriate ledgers.

Education and Training

Education and training are a crucial element to any software installation. EDI Consulting Group offers both traditional classroom training services, as well as interactive multimedia solutions. We take a business approach to help meet your education and training requirements. Our EDI Specialists bring both practical business and hands on technical experience to your companies employees.

Trading Partners

With over 3,500 different mapping guides in ANSI X-12, UN EDIFACT, ASCI, VICS, TDCC, AIAG, UCS, and NWDA, EDI Consulting Group has the resources to set up EDI with any trading partner that you may sell to, or buy from. There are many methods of communication that trading partners use. The most common is a value added network (VAN). This is where all of the information is stored for you and your trading partner to send and receive the information. Other ways include: EDI via the internet, FTP, and direct connect with the trading partner. Whatever requirements your trading partners have, EDI Link v8.0 will allow you to continue to grow your business by fulfilling all of your EDI communication needs.

Documents

The most common documents used today are: purchase order (850), invoice (810), functional acknowledgement (997), advance shipment notification (856), purchase order change (860), and payment order/remittance advice (820). There are over 1,000 different documents for EDI. EDI Link v8.0 is equipped and prepared for any and all documents that your trading partners may require. EDI Consulting Group have worked with over 80% of all documents on the EDI List over the past ten years. Whether it's a purchase order (850) or a planning schedule with release capability (830), EDI Link can do the job right!

Service Bureau

EDI Consulting Group offers affordable ways for many small businesses to become EDI compliant with their trading partners. This service is designed for companies that have to become EDI compliant, but do not generate enough business from the trading partner(s) to justify the investment in in-house EDI software. With minimal initial costs and low monthly transaction costs, the service bureau is a great option for companies that just need a little assistance to become EDI compliant. You no longer have to decide if the business is going to exceed the costs.
