

RedTail Transaction Manager™

The RedTail Transaction Manager™ is the key component in providing a comprehensive EDI solution, by allowing suppliers to receive and review electronic purchase orders and send them directly to their accounting or business system, where they are processed routinely without any manual or duplicate key entry of data. Invoices and shipping information that are generated are automatically routed back to RedTail Solutions for transformation and then forwarded to the corresponding trading partner.

The RedTail Transaction Manager™ enables the transfer and processing of both inbound and outbound EDI documents including:

- Importing purchase orders to a supported accounting system
- Creating advance shipping notification documents (ASN)
- Creating UCC-128 labels
- Creating purchase order acknowledgements
- Exporting invoices to RedTail Solutions, and then on to the corresponding trading partner
- Creating invoice documents for stand-alone installations

**RedTail Transaction Manager™
for ACCPAC Pro Series**

**RedTail Transaction Manager™
for ACCPAC Advantage**

RedTail Solutions provides a complete, cost-effective EDI solution for users interfacing with a Pro Series accounting system. By incorporating a proprietary direct, seamless integration, the RedTail Transaction Manager™ enables suppliers to process their purchase orders easily and routinely, without any manual or duplicate key entry of information, and then send the purchase orders directly to their accounting system. Invoices and shipping information that are generated within Pro Series are automatically routed back through the RedTail Transaction Manager™ where they are transformed and forwarded on to the corresponding trading partner. RedTail also provides the capability to meet the changing requirements of trading partners. RedTail's EDI solution for Pro Series is a quick, simple and efficient approach that enables middle-market companies to work in e-Commerce and EDI with current, as well as future, trading partners.

The RedTail Transaction Manager™ enables the transfer and processing of both inbound and outbound EDI documents.
