

COSS MANUFACTURING SUCCESS : WOODWORKING

Success in woodworking & furniture manufacturing depends on more than quality materials and craftsmanship.

Success depends on business relationships.

Quality relationships enable manufacturers to strengthen their bond with customers.

And a key ingredient in such a relationship is trust. Trust not only that material quality is high and craftsmanship superb; but also that promises are flawlessly kept; that prices quoted are competitive and will be honored; that delivery will be on time. Every time.

To help build customer relationships and generate trust, COSS Systems provides manufacturing software solutions for the woodworking industry.

COSS Manufacturing software features a Scheduling Module to ensure jobs are scheduled, managed and completed on time.

The COSS Configurator enables custom jobs to be quoted, laid out and integrated into production so that promises made are promises kept.

COSS Systems is not equipped to create tables and kiosks, frames and cabinets and shelving units. COSS is here to manage data collection, to execute job costing so that costs are managed in real time; to operate the shop floor, to keep everything running smoothly. So our customers can focus on what they do best: building those invaluable relationships.

If you'd like more information about COSS Systems and discover how COSS Manufacturing software can help your business, please contact us.

We'd be happy to share with you our experience in this sector of manufacturing.

And let you focus on success.
