FOR IMMEDIATE RELEASE

WAC Consulting Inc named Business Partner of the Year for Sage Pro

Sage Software Recognizes Local Business Technology Company

Northborough, October 24, 2006. WAC Consulting Inc, a computer consultancy company specializing in accounting and manufacturing software, announced today that it has been named Business Partner of the Year for Sage Pro by Sage Software, the developer of the software solution. This award recognizes the work performed by WAC Consulting in identifying customers' needs and developing the right solutions to help improve their operations, and contributing to the strong software revenues of Sage Software.

Sage Software helps small and mid-sized businesses to be successful through easy-to-use, scalable and customizable software and complementary services. The company markets its solutions exclusively through its reseller channel, and the competition is fierce within the channel to achieve Business Partner of the Year recognition. WAC Consulting is no stranger to the honor, having been similarly recognized last year. "We are working with top of the line software technologies, built specifically for the markets we serve, the manufacturing and distribution companies of Greater New England," said Bob Distler, President of WAC Consulting, Inc. "But I believe that it's because of our extensive accounting and manufacturing experience that we are able to serve our clients so well and grow our customer base year to year." With the increasing integration of technology into all aspects of a business' operations, WAC Consulting deploys its highly trained staff to help small to medium size companies determine how to remain competitive by utilizing technology wisely.

About WAC Consulting, Inc.

WAC, founded in 1987, helps companies to increase profitability by streamlining their core operations through the deployment of highly-customizable software applications. The company works with clients to analyze their current processes, understand the way they do business, learn where they want to drive their business, and match their needs with appropriate tools. We bring real-world experience to large and small businesses in the areas finance and accounting, manufacturing workflow processes, materials management, engineering data management, and sales force automation. To increase profitability by streamlining your business, call 508-393-7731
